

Test 1 — Answer Key

Each row gives the item number, the B.E.S.T. benchmark and difficulty, the correct answer, and a student-facing explanation.

#	Benchmark	Answer	Explanation
1	MA.6.DP.1.4 easy	4	Count one dot for each student at 2 and to the right of 2.
2	MA.6.NSO.3.2 easy	$2(2 + 7)$	The GCF of 4 and 14 is 2, and $4 = 2 \times 2$, $14 = 2 \times 7$.
3	MA.6.DP.1.5 easy	2, 8 $\frac{1}{2}$, 24, 33 $\frac{1}{2}$, 37	Order the data, find the median, then find the medians of the lower and upper halves.
4	MA.6.NSO.3.4 easy	$3^2 \times 5$	Break the number into factors until every factor is prime, then use exponents.
5	MA.6.AR.2.1 easy	10	Substitute each value for x and check which one makes both sides equal.
6	MA.6.NSO.2.3 easy	\$62.26	Multiply the price by the number of items, then add the one-time fee.
7	MA.6.GR.1.3 easy	4	Points with the same y-coordinate lie on a horizontal line, so subtract the x-coordinates.
8	MA.6.DP.1.1 easy	How many text messages did each student send yesterday?	A statistical question expects different answers from different people, so it produces a set of numerical data.
9	MA.6.AR.2.4 easy	3.2	Subtract the known addend from the total.
10	MA.6.DP.1.6 easy	12 $\frac{2}{3}$	Add the new value to the total and divide by the new number of values.
11	MA.6.GR.2.2 easy	60	The area of a parallelogram is base times height, using the height that is perpendicular to the base.
12	MA.6.NSO.2.2 easy	$\frac{3}{10}$	Multiply numerator by numerator and denominator by denominator, then simplify.
13	MA.6.AR.3.2 easy	\$8.00	Divide the total cost by the number of pounds to get the cost for one pound.
14	MA.6.NSO.3.5 easy	25%	Write the fraction as a decimal, then multiply by 100.
15	MA.6.NSO.4.2 easy	-32	The product of two numbers with the same sign is positive; with different signs it is negative.
16	MA.6.AR.3.1 easy	7:9	Write bus students first, then divide both numbers by their greatest common factor.
17	MA.6.NSO.1.4 easy	-63	Farthest from sea level means the greatest absolute value.
18	MA.6.AR.1.2 easy	$x > 20$	"At least" and "no more than" include the boundary value; "more than" and "under" do not.

#	Benchmark	Answer	Explanation
19	MA.6.NSO.1.1 easy	-5.5	On a number line the least number is the one farthest to the left.
20	MA.6.NSO.1.3 easy	15.6	Absolute value is the distance from 0, so it is never negative.
21	MA.6.DP.1.3 easy	15	The median is shown by the vertical line inside the box.
22	MA.6.AR.2.2 easy	22	Subtract the same number from both sides to undo the addition.
23	MA.6.AR.3.4 easy	120	60% means 60 out of every 100, so multiply the total by 60/100.
24	MA.6.AR.2.3 easy	8	Divide both sides by the coefficient to undo the multiplication.
25	MA.6.NSO.4.1 easy	7	Adding a negative number moves left on the number line; adding a positive number moves right.
26	MA.6.AR.3.5 easy	432 inches	Each foot is 12 inches, so multiply the number of feet by 12.
27	MA.6.AR.1.4 easy	$2x + 10$	Multiply the number outside the parentheses by each term inside.
28	MA.6.GR.2.4 easy	108	Add the areas of all six rectangles in the net; opposite faces match.
29	MA.6.NSO.1.2 easy	-10	Below the surface is negative: $-27 + 17 = -10$.
30	MA.6.NSO.3.3 easy	100	10^2 means 10 multiplied by itself 2 times, not 10×2 .
31	MA.6.DP.1.2 easy	17	Add all the values, then divide by how many values there are.
32	MA.6.NSO.3.1 easy	4	List the factors of each number and choose the largest one they share.
33	MA.6.GR.2.3 easy	112	Volume is length times width times height, or the area of the base times the height.
34	MA.6.GR.2.1 easy	54	A triangle is half of a rectangle with the same base and height, so use one half times base times height.
35	MA.6.AR.3.3 easy	12	Each row multiplies the first ratio by the same number, here 2.
36	MA.6.NSO.1.1 moderate	-4.5, $-\frac{3}{4}$, $\frac{2}{5}$, 3	Order the numbers by their positions on a number line, from left to right.
37	MA.6.AR.1.3 easy	314	Evaluate the exponent before multiplying, then subtract.
38	MA.6.NSO.2.1 easy	18.312	Multiply as with whole numbers, then place the decimal point using the total number of decimal places in the factors.
